github.com/codermrhasan

Very Passionate about programming. Having extreme patience and interest to learn new skills and problem solving. Dream to be an expert software engineer so that I can build useful and valuable software. Looking for a Software Engineer position in a reputed software company that can help to achieve goal.

SKILLS

Languages: Python, JavaScript, C/C++
Other Core Skills: Data Structures and Algorithms, SQL and RDBMS concept
Others: Django, Django REST Framework | HTML, CSS, SASS, React (Basic) | Linux (ubuntu), Git, Docker

Projects and Works

Work Title: Data Structures and Algorithms in Python
Link: https://github.com/codermrhasan/data-structures-and-algorithms
- Implementing data structures and algorithms in python
- Including tests with 87% testing coverage

Project Title: Django React Blog
Link: https://github.com/codermrhasan/django-react-blog
- Implementing full stack technologies (Django, DRF, React, Redux, Docker, Sass etc.)
- Features like; user authentication and authorization, social authentication, CRUD, commenting, posting, etc.
- Includes models testing

Project Title: Django React Todo Separate
Link: https://github.com/codermrhasan/django-react-todo-Separate
- Todo app with separate backend API and frontend Interface.
- Technologies used: DRF, React etc.

Education

Studying Bachelor of Science in Computer Science and Engineering at Asian University of Bangladesh

Awards

AUB Intra University Programming Contest
- Champion among 40 contestants - C/C++

IUT ICT Fest Inter University Programming Contest 2019
- 54th team position among 115 teams - C/C++

Career Interests

Most priority in Software Engineering with Python. Although flexible to choose other languages and technologies. Data Science is a hobby to add in my skill set.
